

KEANEN FARR

FULL - STACK C# .NET WEB DEVELOPER

WORK EXPERIENCE

WEB DEVELOPER

GOLDENWEST FEDERAL CREDIT UNION
OGDEN, UT | 12/2010 – Present

Goldenwest Credit Union is Utah's third-largest credit union with over \$2 billion in assets, 146,000+ members, and 600+ employees. My responsibilities include creating websites and web-based applications for the credit union. I am responsible for adding several features to the online banking website, creating many internal web-based applications, and more. I am somewhat familiar with Symitar SymConnect and SymXChange and am very comfortable with customizing and developing on the Alkami Online Banking platform.

WEB DEVELOPER

VIP EVENT RESOURCES
PARK CITY, UT | 3/2007 – 12/2010

VIP Event Resources makes software for the corporate meetings and incentives travel industry. I was the initial developer for the company tasked with making a custom software solution to automate the business processes involved with managing clients, events, vendors, and staff. The application has since grown into a commercial application that is in use in 26 countries by the some of the largest companies in the industry.

- Designed a commercially-available software application that manages the entire business process for destination management companies. I worked at all tiers of the application including graphic design, user interface, business logic, and database.

- Created several SEO-friendly public marketing websites for the parent company's three other divisions.

WEB DEVELOPER / WEB DESIGNER

SPRING2 TECHNOLOGIES
SANDY, UT | 6/2005 – 3/2007

Spring2 is a custom software development and consulting firm. My primary responsibility was the user interface design of several large applications for various clients. The company standardized on a .NET based open-source MVC platform and my job was to integrate UI layer into the business logic.

SKILLS

MICROSOFT .NET STACK

- C#
- ASP.NET (MVC, WebAPI, WebForms)
- Visual Studio

FRONT-END

- HTML5
- JavaScript
- jQuery
- JSON / REST
- Some knowledge of Angular and React
- CSS
- SCSS
- Bootstrap
- WPF

DATABASE

- SQL
- MSSQL
- SSMS
- Entity Framework
- ADO.NET

Continued...

- Designed the UI for two e-commerce systems for companies in the direct sales industry. Modules included order entry, content management system, order history, customer service.

- Developed a custom, AJAX-enabled application that allowed customers to create and order custom lettering designs online. The orders would then be fulfilled by the company in the form of vinyl lettering that could then be applied to any surface (a wall for example).

- Designed SEO-friendly public marketing websites for clients.

SOFTWARE ENGINEER II

AMX INTERNATIONAL

SALT LAKE CITY, UT | 3/2005 – 6/2005

This was a short-term project designing web-based billing and management software for utility companies. The original application was developed as a standard desktop application and our team was tasked with converting it to a web-based platform.

WEB DEVELOPER

STAKER & PARSON COMPANIES

OGDEN, UT | 5/2004 – 3/2005

Staker & Parson Companies is a large construction firm with hundreds of locations and thousands of employees throughout the western United States.

I designed multiple custom web applications to manage the company's construction process including:

- A web-based time and equipment billing and reporting system for managers.

- A field data entry system running on Windows Mobile devices (.NET Compact Framework) that would synchronize data over cellular networks. The system was integrated with the web-based time and equipment billing and reporting system.

- A property management system that tracked the status of each property the company owned and reminded managers when important events were due for each property.

- A resource distribution and customer ranking system that allowed the company to prioritize distribution of sometimes limited resources (i.e. concrete) to their best customers.

WEB DEVELOPER

STAMPIN' UP!

SANDY, UT | 10/2002 – 5/2004

Stampin' Up! is a \$200-million/year, 500+ employee company in the craft/scrapbooking industry. At the time, their website received an average of 25,000 unique visits every day (over 1.5 million hits).

I worked with a team of approximately 30 people in the IT department
